

Get Stylin'

You know how great you feel when you finish your favorite outfit with just the right accessories to pull the entire look together? Your home should give you that same feeling...completely put together, polished but not overdone or impersonal.

Design professionals use the magic of styling to give a room personality - your personality. Styling done right is NOT staging, which intentionally depersonalizes a space. Styling does just the opposite, it creates warmth and a sense of calm in your everyday living space.

You might be asking why you need a professional to bring in the life and energy that reflects you and your family. There are a few reasons. As objective "outsiders," we know how to curate a collection of tasteful touches that may never have occurred to you, yet fit right in and become personal to your home. Plus, we have a vast array of sources from which to draw. And we understand the balance that keeps any space from looking over accessorized and cluttered. Last, we don't waste money on purchases that won't stand the test of time.

WHERE TO STYLE

Styling one room or many should be a consideration whether you have lived in your home for years or have just renovated a space or built your dream home. A lovely tray skillfully styled and placed on an ottoman. An entry table that says "welcome to our home." A kitchen counter that reflects a sense of love for well prepared food and drink. A mantle or bookcase that invites visitors to get to know something about you and your family. Unexpected pops of color in artwork and pillows.

For us, styling is the final touch. Without it, you may have a beautiful space but it won't feel finished. Styling is what helps turn a house into a home.
